EXP NO: 4

To Count the frequency of occurrence of a word in a body of text is often needed during text processing

AIM:

Import the word_tokenize function and gutenberg.

PROGRAM:

```
import nltk
from nltk.tokenize import word_tokenize
from nltk.corpus import gutenberg
nltk.download('gutenberg')
nltk.download('punkt')
nltk.download('punkt_tab')
sample = gutenberg.raw("austen-emma.txt")
token = word_tokenize(sample)
wlist = []
for i in range(50):
    wlist.append(token[i])

wordfreq = [(w, token.count(w)) for w in wlist]
print("Pairs\n" + str(list(zip(wlist, wordfreq))))
```

OUTPUT:

```
[nltk_data] Downloading package gutenberg to /root/nltk_data...
[nltk_data]   Package gutenberg is already up-to-date!
[nltk_data] Downloading package punkt to /root/nltk_data...
[nltk_data]   Package punkt is already up-to-date!
[nltk_data] Downloading package punkt_tab to /root/nltk_data...
[nltk_data]   Unzipping tokenizers/punkt_tab.zip.
